SEKEN LIVING DESIGN STORY

Global social and environmental issues and challenges impact all of us, and all countries. These challenges threaten the very sustainability of our planet, and as such, we all have a role to play in resolving them. Seken Living as a design and manufacturing business, with more than 10 years' experience in the woodworking industry, are no exception. Sustainability has been an important part of our business from the very beginning. Our commitment to sustainability requires perseverance and determination about the environment, and social aspects of manufacturing. In order to benchmark ourselves against global best practice, we have applied for and received Forestry Stewardship Councils (FSC) certification for recycled teak.

The Forest Stewardship Council (FSC), is an international, non-governmental organisation dedicated to promoting responsible management of the world's forests. Seken Living specifically applies to FSC Recycled which means all wood, paper and/or other wood-based materials in a product come from recycled or reclaimed (re-used) material. Using recycled wood makes the most of precious forest resources and reduces the pressure to harvest more trees. We use 100% recycled wood, mainly teak (*Tectona Grandis*) from old buildings all over Java and other provinces in Indonesia.

In addition, we use mainly non-toxic chemical and environmentally friendly finishing as a way to complete the production process. Besides the environmental aspects, we appreciate the beauty of the natural look of the wood so using natural finishing becomes the best option.

Given the fact of the uses of natural material and natural finishing, Seken living has also completed the flatpack or knockdown construction which suitable for most of the product. Flatpack or knockdown product are more effective and efficient in the term of shipping. It allows to reduce the carbon foot print and maximize the space in the container.

In our sustainability efforts, we are trying to produce products with a long lifespan, thus reducing the need for mass production, which in turn reduces the demand on the raw materials. We do this by; designing in an original but classic way, and ensuring that our construction is long lasting and durable.

In addition to sustainability, durability become one of the most important aspect that we put our soul and mind into it. Durable is the core that allows a product to last longer. Seken living confident, as a manufacturer who have an experience for years in this field, with a countless research for wood construction, we can ensure that our product is durable enough to stand a longtime.

In the end, Seken Living's sustainability mission is to produce furniture that has timeless design, durability and long-lasting quality, as our commitment to the environment around us and the people who live in it.

CARE INSTRUCTION

RECYCLED TEAK WOOD

Natural

Most of Seken Living's product are made from recycled teak wood with natural finishing. The wood itself are comes from various sources in Indonesia such as Javanese old building, railway sleepers and bridges. The characteristic of teak wood is extremely durable, beautiful natural brown colour, dense and solid suitable for indoor and outdoor use. Using recycled wood means accepting the imperfection side such as wood patches, different wood colour one of each other, and minor black spot from bolt and nails which might appear through the time.

TREATMENT FOR INDOOR USE

Natural finishing means there isn't any varnish applied for the timber, therefore spills should be removed immediately to prevent staining the surface.

For regular care, clean the product from the dust with soft cloth/brush. For thorough cleaning in case of mold and stain, use damp cloth with natural soap and wipe in the direction of the grain. Sand paper can be used if there are any scratches or stain remained.

TREATMENT FOR OUTDOOR USE

Avoid letting water stand on the surface of furniture for too long, use soft cloth to dry and protect from staining or put the items under a shelter or roof.

Due to different weather, climate, rain and humidity, natural oil from teak wood might appear. There might be stain left on the surface or the cushion. The way to prevent this is using a furniture cover when the product is not in use. When the furniture without any cover are exposed in direct sun and rain, the colour will be changing time to time. From natural brown colour to pale brown then into grey colour.

Changes in weather and climate could create a hairline crack to the assembly joints and the grain, but this does not affect the structural and construction of the product.

Varnishing could be an option to minimize the aging and colour changing. Hardwood & teak shield protection from Golden Care could be applied as a coating for the surface especially for outdoor use.

RECYCLED TEAK WOOD

Varnished

Some of our product are varnished based on client request or our special collection. The finishing could be vary; antique washed, white washed, fume, black, and politure (polish). The varnishes are mainly to repel substances and fluids, such as coffee, tea and wine. However, spills should be removed immediately.

TREATMENT

Natural finishing means there isn't any varnish applied for the timber, therefore spills should be removed immediately to prevent staining the surface.

IRONWOOD

Natural

Iron wood or Ulin is one of the most durable wood from Indonesia. This wood has beautiful dark brown colour. The characteristic of this wood is strong, hard, solid, heavy and dense more than teak wood. Based on this special characteristic, iron wood is extremely durable for outdoor use.

TREATMENT

Iron wood has more resistance factor in various weather, however to minimize the aging, furniture cover could be an option to protect the wood when not in use or put the furniture under a shelter or roof. When the product in iron wood are exposed directly in sun, there might be colour changing from time to time, from dark brown colour into greyish pale brown.

Though the wood is durable, extreme climate and weather still affect the product. There might be any crack appear in the assembly joint and grain, but this does not affect the construction of the product.
